

DOUBLE MANIFOLD

DUAL MANIFOLDS					
Part No.	description	Dimension in mm		DNM	DNP
		A	B		
229-MD040025	MANIFOLD DOUBLE 40 304 SS	600	300	40mm	25mm
229-MD050032	MANIFOLD DOUBLE 50 304 SS	600	300	50mm	32mm
229-MD065040	MANIFOLD DOUBLE 65 304 SS	600	300	65mm	40mm
229-MD075050	MANIFOLD DOUBLE 75 304 SS	700	360	75mm	50mm

The double manifolds are designed to be used on the suction and delivery side of a dual pump set to reduce installation time and ensure even flow and control. The manifolds come in four main sizes to suit different pump ports and flow rates. Each one has a single 1" port for a valve, pressure tank or hose, two 1/4" ports for pressure gauges or pressure transducers and a mounting point for a support foot.
